
Review some of our Representative Projects (1997-present)

The following are examples of the type and scope of projects we have conducted. Please note the long-term and repeat nature of our work with our clients, and the overall variety and creativity we bring to bear to devise solutions. In addition to those listed here, we have also conducted numerous well testing, siting, and improvement projects for industry and small community, transient and nontransient public water supplies. Our brief [capabilities statement may be found here](http://www.groundwaterscience.com/view-category/capabilities-statement/). If you wish to be provided with a detailed qualifications statement with project contacts, please [contact Stuart](#) [contact us](#).

An automated slideshow of our project summaries is below. To see the entire list in menu format, please [click here](#).
